PRODUCTINFOS

4-channel speaker volume control, stereo

Particularly high quality due to transformer technology with universal output assignment (4-16 Ω for each speaker), 20-20,000 Hz, attenuation in 10 steps for each pair, position 0 is OFF.

- 2 stereo inputs (100 W max. for each channel) and 4 stereo speaker outputs (18 W/4-16 Ω each)
- Source selector switch for each speaker output
- Screw terminals
- Black metal housing
- Dimensions: 432 x 78 x 190 mm
- Weight: 3.4 kg

With this device, it is finally possible to adjust the level of several pairs of speakers (up to 4) independently, even without 100 V line technique and connect them together to basic amplifiers without any problems. Even speaker systems with different impedances between 4 and 16 Ω can be mixed as desired. Ideally suited for restaurants and bars.

TECHNICAL SPECIFICATIONS

ATT-442ST

Description	wall-mounted PA volume control
Frequency range	20-20,000 Hz

ATT-442ST

Power rating	100 W
Dimensions	432 x 78 x 190 mm
Weight	3.4 kg
